Green Investor

Peter Krull, *Bethany '93*, started his own financial-services firm to offer exceptional service to his clients and do so in a green and responsible manner. Today, his firm is considered a leader in the sustainable-investment industry.

"Social and environmental responsibility are the keys to unlocking our potential as a society. These principles reflect the basic tenets of Phi Kappa Tau's mission of ethical leadership. My investment management firm was founded with this philosophy in mind, that people should be able to align their investments with their values. Phi Kappa Tau helped me develop the skills to be an environmental advocate, community leader and the founder of a sustainable and responsible business. Plus, it feels good helping people put their money where their mouth is."
